PROJECTS

AI Image Generator Technologies: React.js, TypeScript, Tailwind CSS, Hugging Face Inference API	2026 GitHub
- Developed a scalable web application using React and TypeScript, leveraging Hugging Face Inference API to generate images via Stable Diffusion XL. - Utilized TypeScript for robust type-checking of API responses and component props, reducing runtime errors and improving code maintainability. - Implemented React Hooks (useState, useEffect) and Async/Await for efficient state management and handling real-time image blob data. - Designed a responsive UI with Dark/Light mode persistence and skeleton loaders to enhance user experience during heavy API latency.
